

MINI JOHN COOPER WORKS CLUBMAN.

NOT A CHALLENGE. A STATE OF MIND.

The MINI John Cooper Works Clubman combines fascinating extremes and exclusive style. It has 6 doors, but still accelerates from 0 to 100 km/h in 6.3 seconds. It's stylish, but loads of fun to drive thanks to a 231-hp/170-kW engine that generates 350Nm of torque and ALL4 all-wheel-drive. It cuts an imposing figure too, but slips smoothly through the oncoming wind thanks to the John Cooper Works aerodynamic kit.

A sleek set of LED rear lights are the most striking feature at the rear of the MINI Clubman. Two wide-set and pipes and the muscular rear apron accentuate its wide track and low centre of gravity, while the long wheelbase and elongated roof line ensure an elegant overall profile and a more spacious feel inside.

Impressive performance, unique design and versatility – it's all here.

TECHNICAL DATA.

MINI JOHN COOPER WORKS CLUBMAN

Cylinders/layout/valves per cylinder	4/in-line/4
Displacement (cc)	1998
Max. output/Max. revs (kW/hp/rpm)	170/231/5000-6000
Max. torque/revs (Nm/rpm)	350/1450-4500
Max. speed (km/h)	238
Acceleration 0-100 km/h (sec.)	6.3
Combined CO2 (g/km)	168
Combined fuel consumption from ECO Sticker result (km/l)	14.1
Fuel tank capacity (l)	48
Fuel type	Gasoline
Luggage capacity (l)	360-1250

PERFORMANCE MEETS ELEGANCE.

With great power comes great responsibility: an engine that packs a punch still needs to be harnessed effectively. For this you need sturdy 4-piston, fixed caliper brakes, which come with Red fixed calipers and the John Cooper Works logo. The logo is a symbol of racing pedigree and can also be found on the Chili Red side scuttles and stylish door sill finishers.

The roof spoiler with aerodynamic spoiler lip ensures greater downforce, stainless-steel end pipes (in Chrome) of the sports exhaust round off the racy look.

ALL IN. WITH ALL 4.

The standard ALL4 all-wheel-drive in the MINI John Cooper Works Clubman intelligently transforms the enormous torque into acceleration that thrills. Its electro-hydraulic multi-disc clutch is linked to Dynamic Stability Control and smoothly varies the amount of drive torque distributed from the MINI Twin Power Turbo engine to the front and rear axles according to the driving situation. That all means supreme traction on every road surface, maximum stability and even more fun cruising around corners.

1. Straight, level road.

To maintain efficiency in normal driving situations. e.g. on straight, level roads, the system diverts 100% of the torque to the front axle.

2. Cornering.

ALL4 allocates enough torque to the rear axle to counter the onset of over/understeer and increase stability.

3. Wet and slippery roads.

More torque is directed to the rear axle – in some cases up to 100% – when a loss of grip occurs at the front. This counteracts understeer and ensures optimal traction.

4. Uneven surfaces.

ALL4 rapidly allocates the optimum amount of power to each axle to ensure maximum traction on uneven roads.

SPECIFICATION. JOHN COOPER WORKS CLUBMAN

TRANSMISSION AND TECHNOLOGY	
Steptronic Sport transmission with (8-speed)	with Gearshift paddles
Start/Stop button, with keyless start	0
Automatic start / stop function	0
Performance Control	0
