

JOHN COOPER WORKS.

**REAL LEGENDS ARE
REWRITTEN EVERY DAY.**

Few people rise to the challenge of bettering themselves again and again. One such person, however, was John Cooper. When he first laid eyes upon the classic Mini, this ingenious design engineer already recognised the makings of a rally champion. The Mini Cooper won the Monte Carlo rally not once but three times, triumphing over its mechanically far more powerful rivals. Our four high-performance John Cooper Works models embody the long-standing heritage of this motor racing legend.

The powerful engines, the specially designed chassis and the brakes make these extraordinary driving machines what they are. Even in the standard model, the sporty flourishes are evident in every nook and cranny of the car. Precision detailing and high-performance technology enhance the authentic motor racing sensation wherever you may be driving. In a MINI John Cooper Works, you'll feel like a champion on every inch of the road.

**READY FOR A
FAST LAP?**

At the heart of both the MINI John Cooper Works Hatch and the MINI John Cooper Works Convertible beats the same powerful 231 hp/170 kW MINI Twin Power Turbo engine, boasting an impressive 320 Nm torque for short bursts of speed. The Hatch takes just 6.1 seconds to get from 0 to 100 km/h, the Convertible just 6.5 seconds.

As standard, these cars feature the sports suspension for perfect roadholding, the aerodynamic kit with John Cooper Works custom air intakes to keep the engine and brakes cool, body-coloured side skirts and a rear apron with diffuser-style insert for optimum airflow. There's also the John Cooper Works sports exhaust system, which produces the ultimate sporting soundtrack; with the hood down in the Convertible, the exhilarating roar of the engine is akin to an open-air concert.

FINELY TUNED POWER.

The new MINI John Cooper Works Clubman and MINI John Cooper Works Countryman incorporate the most powerful drive ever to be fitted as standard in a MINI. The turbocharged engine registers an impressive 306 hp/225 kW and 450 Nm torque. Both models feature ALL4 all-wheel drive as standard, which harnesses this enormous power and guarantees maximum driving stability. The electrohydraulic multi-plate clutch automatically and seamlessly delivers the optimum input torque required between the front and rear axle, whatever the driving situation. A mechanical locking differential on the front axle ensures optimum handling round every corner.

Meanwhile, the eight-speed automatic transmission provides the perfect gear ratio between the engine and drive unit. The MINI John Cooper Works Clubman goes from 0 to 100 km/h in 4.9 seconds, the MINI John Cooper Works Countryman in 5.1 seconds.

LIFE IN POLE POSITION.

Anyone who has sat behind a John Cooper Works leather steering wheel (1) will have had the pleasure of experiencing the perfect lateral support of the standard John Cooper Works sports seat – complete with John Cooper Works logo below the headrest. Upon request, they are also available in the exclusive Dinamica/leather combination* Carbon Black (1).

When the engine starts, the John Cooper Works start screen of the MINI Centre Instrument (3) lights up in all its Chili Red glory. The MINI Head-Up Display (2) prominently projects all the relevant driving data into your field of vision – exclusive to the John Cooper Works models with the sport automatic transmission, this data includes the current speed, the gear selection and the optimum gearshift point.

* Leather covering on the seat cushions, the backrest and the front and back headrests.
Remark: Seats and interiors may vary from the model shown.

EXCLUSIVE SPORT BADGES.

It's never enough to simply unleash extreme power; it needs to be controlled too. That's why the John Cooper Works front spoiler (1) and the John Cooper Works roof spoiler – pictured here (2) on the new MINI John Cooper Works Clubman – are designed to deliver more downforce and help the car cling more tightly to the road as the car speed increases. Maximum braking power comes courtesy of the 4-disc fixed calliper brakes (4) with red brake callipers. The John Cooper Works

logo is a hallmark of proven motor racing credentials. It is located on the racing-look side scuttles in Chili Red (3), among other places. The twin pipes of the John Cooper Works sports exhaust are housed in the centre of the diffuser-style insert at the rear of the Hatch and the Convertible. On the Clubman (5) and Countryman, the stainless steel tailpipes of the dual exhaust system are integrated externally into the bumper.

WHEELS THAT TURN HEADS.

Whether 18" or 19", in 2-tone, the extensive choice of alloy wheels guarantees the perfect finishing touch to your truly personalised MINI John Cooper Works model. To see instantly how each option looks on a MINI, check out the MINI Configurator on the MINI website.
